3mm foam board/Acrylic

additional info

Recommended accessories:
15mm Double sided tape-TAPE001A (required to attach foam board to PVC wing)

Edge to edge mag Tape -EM400 (required to create a seamless graphic)

Assembly Instructions

Graphic attachment

To attach a graphic to the PVC wing apply 15mm double sided tape to the PVC wing

Once the double sided tape has been applied simply attach the PVC wing to the edge of the graphic and apply pressure to make sure the PVC wing is fully secure

Once the graphic is in place, simply click the PVC wing into the channel on the linear until fully secure

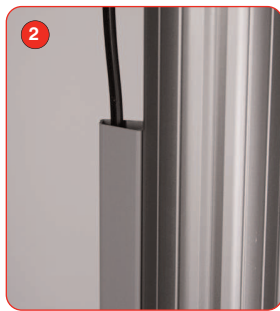

Align the edge to edge mag tape together to create a seamless graphic

Cable management

To use the PVC wing for cable management insert the cable into the PVC wing

Once the cable is in place attach the PVC wing by clicking the wing into the channel making sure the wing is fully secure.

Important: when removing the PVC wing make sure that you are facing the graphic and pull the graphic towards you to remove.
